

Weltrend Semiconductor, Inc. WT8871 Product Brief

Overview

The WT8871-C/WT8871-E is a highly integrated video display controller for small size LCD display application, such as portable DVD player and car TV application. It has built-in video decoder, scaler, de-interlacer, TCON, 8-bit MCU, OSD, PWM and DC-to-DC converter functions. WT8871-C/WT8871-E has triple DAC and VCOM output for analog LCD panel application.

Features

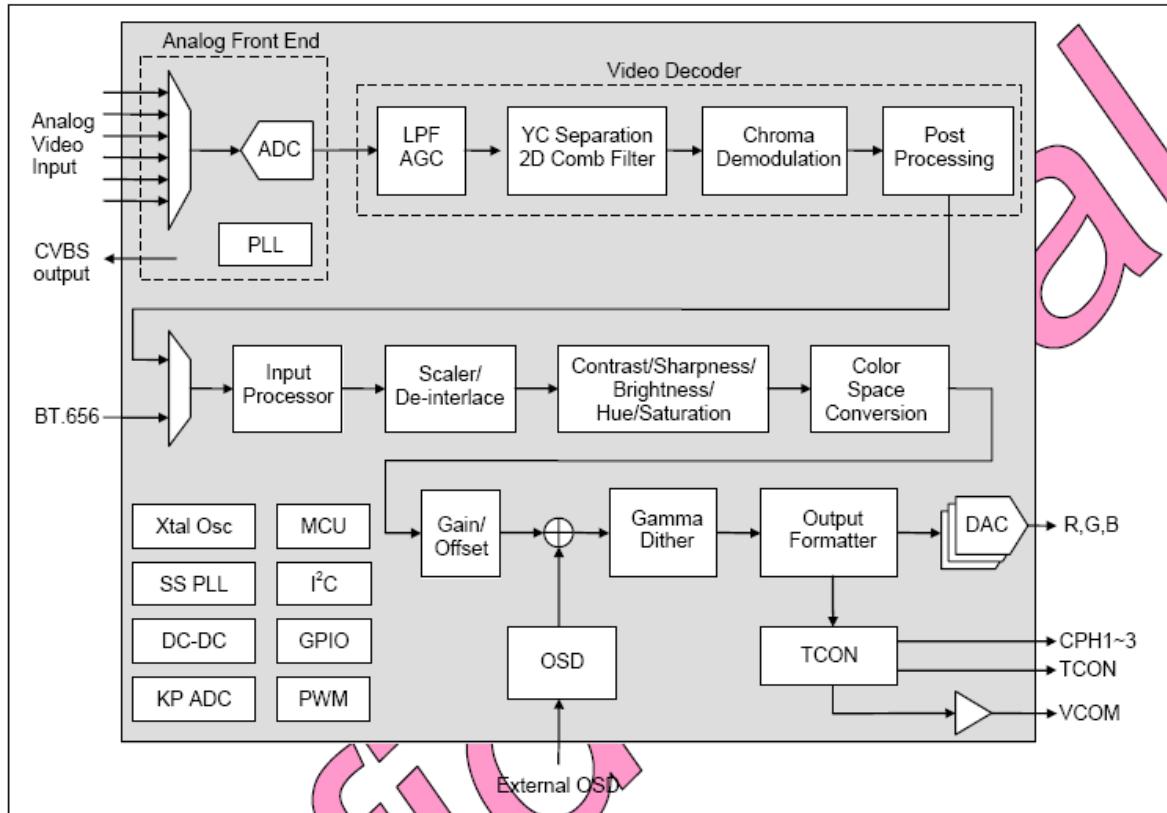

- **Video input port**
 - 6 analog inputs
 - Support CVBS and S-video input
 - Support RGB input for GPS module and component input
 - Digital input: 8-bit 4:2:2 ITU-BT.656 or BT.601 interface
 - Support 720x480i and 720x516i input resolution
- **LCD panel interface**
 - Triple 8-bit DACs output RGB signals for analog panel
 - Programmable timing controller for different type of panels
 - Programmable gamma table for panel compensation
- **2D video decoder**
 - 10-bit ADC
 - Supports CVBS, S-video and RGB input
 - Decodes NTSC (M, Japan, 4.43), PAL (B ,G ,D ,H ,I ,Nc), and SECAM
 - Multi-standard adaptive 2D comb filter
 - Safe Hsync, Vsync and field signal outputs when VCR trick mode
 - Auto detection and decodes Macrovision copy protection
 - Chroma Transient Improvement (CTI)
 - Luma Transient Improvement (LTI), edge/sharpness improvement
 - Luma Coring noise reduction
- **Display format conversion**
 - Programmable horizontal and vertical zoom ratio
 - Support non-linear scaling for 4:3 to 16:9
 - Convert interlaced input to progressive
- **Luminance and chrominance adjustment**
 - Contrast adjustment with black/white level stretch
 - Brightness adjustment
 - Sharpness adjustment
 - Hue adjustment
 - Saturation adjustment
- **OSD**
 - Character based OSD
 - Font size: 12x18 dots
 - Font ROM: 512 single color fonts

- Display RAM : display up to 512 characters
- User-font RAM : up to 142 single color fonts
- Support 2-bit multi-color font
- Shadow and border effect of character
- Two display windows
- Programmable background window
- Support alpha blending
- Support blinking effect
- Support fade in/out effect
- Support external OSD interface
- **MCU**
- Built-in 8051 CPU
- Data memory: 384 bytes RAM
- Support external program memory with serial flash memory via 4-wire interface
- Internal MCU can be disable by pin mode0 and mode1
- 8-bit ADC for keypad scanning and others
- Two slave mode I2C interfaces, up to 400KHz - Interface for ISP, ICE and other I2C master
- Standard UART port support.
- Support Infra-Red remote control
- Four PWM outputs including one low frequency PWM
- Built-in self test pattern generator
- Two DC-DC boost circuits for VGH and VGL
- General purpose I/Os
- Spread spectrum PLL for panel clock, lower EMI
- Crystal oscillator- 24MHz
- **Package type:**
- 128-pin LQFP, 14mm(L) x 14mm(W) x 1.4mm(H)
- Green package available

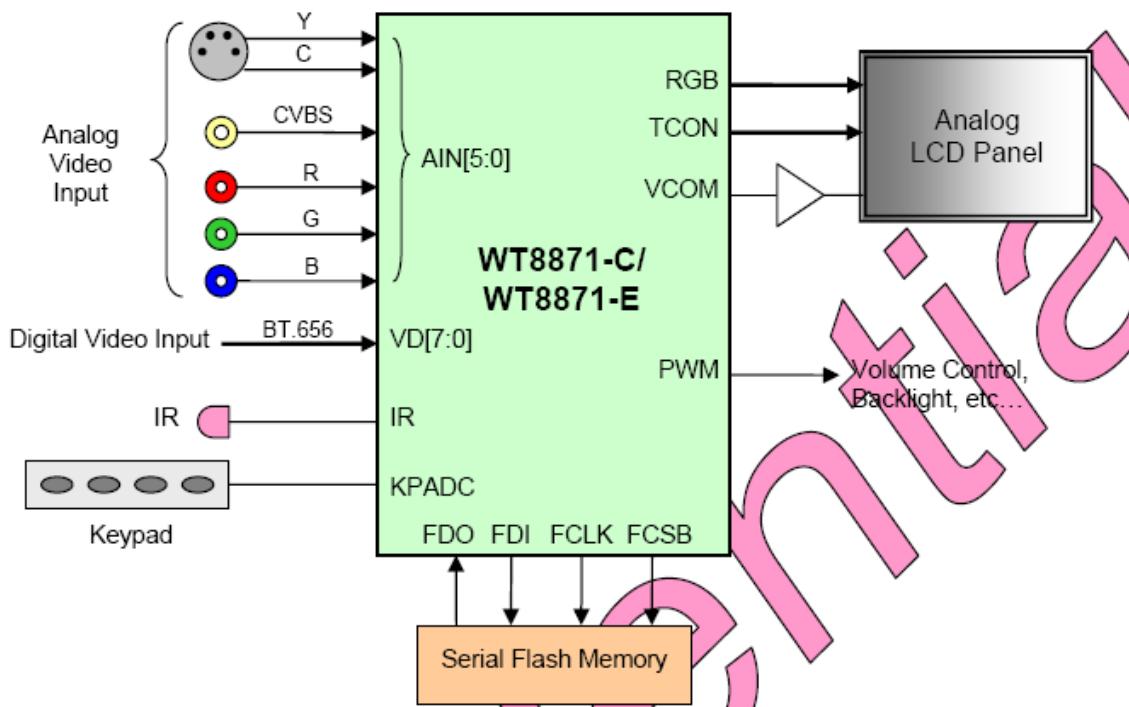

Application

- Portable DVD Player
- Car information, entertainment system
- Portable DTV
- Digital photo frame

Block Diagram

Application Example

Weltrend Semiconductor, Inc.

WT8871 Product Brief

2 . Package Type and Pin Description

2.1. Pin Configuration

1	VDDP	VREF	127		VSS	96
2	/RESET	AVD26_B6	126		ADC0	95
3	MODEB	AVSS_B6	125		ADC1	94
4	MODE1	A1N6	124		ADC2_RXD	93
5	VDHS	A1N4	123		ADC3_TXD	92
6	VDVS	A1N3	122		AVD33_AD	91
7	VDCK	A1N2	121		AVS5_AD	90
8	VD0	A1N1	120		GPIO15	89
9	VD1	A1N0	119		GPIO14	88
10	VD2	AVD26_AF	118		GPIO13	87
11	VD3	AVSS_AF	117		GPIO12	86
12	VD4	MUX0	116		GPIO11	85
13	VD5	S0GIN	115		GPIO10	84
14	VD6	CVBS0	113		GPIO9	83
15	VD7	CVBS1	112		GPIO8	81
16	ICE_SDA	AVS5_CVBS	111		VDDP	80
17	ICE_SCL	AVSS_PLL27M	110		VDD26	79
18	VSS	AVD26_PLL27M	109		VSS	78
19	VDD25	PLL27M_LF	108		XTAL1	77
20	GPIO_PWM3	AVD25_PLL	107		XTAL2	76
21	GPIO_PWM2	AVSS_PLL	106		VD26_XTL	75
22	GPIO_PWM1	VDD25	104		GPIO7	74
23	GPIO_PWM0	VSS	103		GPIO8	73
24	VDDP_PWM	IR	102		GPIO5	72
25	D2D_SW1	INT	101		GPIO4	71
26	D2D_RC1	FCISB	100		GPIO3	70
27	D2D_FB1	FDO/SCL	99		GPIO2	69
28	VD5_D2D	FDI/SDA	98		GPIO1	68
29	VSS_D2D	FCLK/MCLK	97		VDDP	66
30	D2D_FB2	VDDP	96		VDD26	65
31	D2D_RC2	VSS	95		VSS	65
32	D2D_SW2		94

62	AVD6_DAC		64			
63	AB0		63			
64	AVSS_DAC		62			

2.2 Pin Description

Weltrend Semiconductor, Inc.

WT8871 Product Brief

WT8871-C/ WT8871-E	Pad Name	I/O	Pull up/down	Description
1	VDDP			3.3V Power.
2	RESETB	I	pull-up	Reset pin. Active low.
3	MODE0	I	pull-down	Operating mode selection. 00 : Internal MCU mode using external flash 01 : Reserved 10 : External MCU mode 11 : Reserved
4	MODE1	I	pull-down	
5	VDHS/OSDHHS	I/O	pull-down	BT.601 Hsync I/O or Hsync output for external OSD. Shared with GPIO.
6	VDVS/OSDVHS	I/O	pull-down	BT.601 Vsync I/O or Vsync output for external OSD. Shared with GPIO.
7	VDCK/OSDCK	I/O	pull-down	BT.656/601 clock I/O or clock output for external OSD. Shared with GPIO.
8	VD[0]/OSDBIN	I/O	pull-down	BT.656 /601 video data I/O or external OSD blue input. Shared with GPIO.
9	VD[1]/OSDGGIN	I/O	pull-down	BT.656/601 video data I/O or external OSD green input. Shared with GPIO.
10	VD[2]/OSDRIN	I/O	pull-down	BT.656/601 video data I/O or external OSD red input. Shared with GPIO.
11	VD[3]/OSDINT	I/O	pull-down	BT.656/601 video data I/O or external OSD intensity input. Shared with GPIO.
12	VD[4]/OSDFB	I/O	pull-down	BT.656 /601 video data I/O or external OSD fast blanking input. Shared with GPIO.
13	VD[5]	I/O	pull-down	BT.656/601 video data I/O. Shared with GPIO.
14	VD[6]	I/O	pull-down	BT.656/601 video data I/O. Shared with GPIO.
15	VD[7]	I/O	pull-down	BT.656/601 video data I/O. Shared with GPIO.
16	ICE_SDA	I/O	pull-up	I ² C data pin.
17	ICE_SCL	I/O	pull-up	I ² C clock pin.
18	VSS			Ground.
19	VDDC			2.5V Power.
20	PWM[3]	I/O	pull-up	PWM output or 8051 P1[3]. Shared with GPIO.
21	PWM[2]	I/O	pull-up	PWM output or 8051 P1[2]. Shared with GPIO.
22	PWM[1]	I/O	pull-up	PWM output. Shared with GPIO.
23	PWM[0]	I/O	pull-up	PWM output or low frequency PWM output. Shared with GPIO.
24	VDDP_PWM			3.3V or 5V Power.
25	D2D_SW1	O		DC-to-DC switching pulse.
26	D2D_SS1	I/O		DC-to-DC soft start pin. Shared with GPIO.
27	D2D_FB1	I/O		DC-to-DC feedback pin. Shared with GPIO.
28	VD5_D2D			3.3 or 5V Power for DC-to-DC.
29	VSS_D2D			Ground for DC-to-DC.
30	D2D_FB2	I/O		DC-to-DC feedback pin. Shared with GPIO.
31	D2D_SS2	I/O		DC-to-DC soft start pin. Shared with GPIO.
32	D2D_SW2	O		DC-to-DC switching pulse.
33	VSSP			Ground.
34	TCON[0]	I/O	pull-down	TCON output. Shared with GPIO.
35	TCON[1]	I/O	pull-down	TCON output. Shared with GPIO.
36	TCON[2]	I/O	pull-down	TCON output. Shared with GPIO.
37	TCON[3]	I/O	pull-down	TCON output. Shared with GPIO.
38	TCON[4]	I/O	pull-down	TCON output. Shared with GPIO.
39	TCON[5]	I/O	pull-down	TCON output. Shared with GPIO.

40	TCON[6]	I/O	pull-down	TCON output. Shared with GPIO.
41	VDDP			3.3V power for PAD
42	TCON[7]	I/O	pull-down	TCON output. Shared with GPIO.
43	TCON[8]	I/O	pull-down	TCON output. Shared with GPIO.
44	TCON[9]	I/O	pull-down	TCON output. Shared with GPIO.
45	TCON[10]	I/O	pull-down	TCON output. Shared with GPIO.
46	TCON[11]	I/O	pull-down	TCON output or panel data enable. Shared with GPIO.
47	CPH3	I/O	pull-down	TCON clock 1 or panel hsync. Shared with GPIO.
48	CPH2	I/O	pull-down	TCON clock 2 or panel vsync. Shared with GPIO.
49	CPH1	I/O	pull-down	TCON clock 3 or panel clock. Shared with GPIO.
50	VSSP			Ground.
51	VDD25			2.5V Power.
52	AVD25_SSPLL			2.5V Power.
53	AVSS_SSPLL			Ground.
54	SSPLL_VCO1			Loop filter 1 of spectrum PLL.
55	SSPLL_VCO2			Loop filter 2 of spectrum PLL.
56	AVSS_VOCM			Ground.
57	VCOM	AO		VCOM Output.
58	AVD5_DAC			5V power.
59	ARO	AO		Analog Red signal output
60	AVSS_DAC			Ground for DAC.
61	AGO	AO		Analog Green Output
62	AVD5_DAC			5V power for DAC
63	ABO	AO		Analog Output
64	AVSS_DAC			Ground.
65	VSS			Ground.
66	VDDC			2.5V Power.
67	VDDP			3.3V Power.
68	GPIO[0]	I/O	pull-down	GPIO.
69	GPIO[1]	I/O	pull-down	GPIO.
70	GPIO[2]	I/O	pull-down	GPIO.
71	GPIO[3]	I/O	pull-down	GPIO.
72	GPIO[4]	I/O	pull-down	GPIO.
73	GPIO[5]	I/O	pull-down	GPIO.
74	GPIO[6]	I/O	pull-down	GPIO.
75	GPIO[7]	I/O	pull-down	GPIO.
76	VD25_XTE			2.5V Power.
77	XTAL2	O		Crystal oscillator output.
78	XTAL1	I		Crystal oscillator input.
79	VSS			Ground
80	VDDC			2.5V Power.
81	VDDP			3.3V Power.
82	GPIO[8]	I/O	pull-down	GPIO.
83	GPIO[9]	I/O	pull-down	GPIO.
84	GPIO[10]	I/O	pull-down	GPIO.
85	GPIO[11]	I/O	pull-down	GPIO.
86	GPIO[12]	I/O	pull-down	GPIO.
87	GPIO[13]	I/O	pull-down	GPIO.
88	GPIO[14]	I/O	pull-down	GPIO.
89	GPIO[15]	I/O	pull-down	GPIO.
90	AVSS_KP			Ground.
91	AVDD_KP			3.3V power.

Weltrend Semiconductor, Inc.

WT8871 Product Brief

92	KPADC[3]/TXD	I/O	pull-up	Keypad ADC input or UART TXD. Shared with GPIO.
93	KPADC[2]/RXD	I/O	pull-up	Keypad ADC input or UART RXD. Shared with GPIO.
94	KPADC[1]	I/O	pull-up	Keypad ADC input or 8051 P1[0]. Shared with GPIO.
95	KPADC[0]	I/O	pull-up	Keypad ADC input or 8051 P1[0]. Shared with GPIO.
96	VSS			Ground.
97	VDDP			3.3V Power.
98	FCLK	I/O	pull-up	Connects to serial flash clock.
99	FDI	I/O	pull-up	Connects to serial flash data output.
100	FDO	I/O	pull-up	Connects to serial flash data input.
101	FCSB	I/O	pull-up	Connects to serial flash chip select.
102	INTB	I/O	pull-up	Interrupt input.
103	IR	I/O	pull-up	IR input. Shared with GPIO.
104	VSS			Ground
105	VDDC			2.5V Power.
106	AVSS_PLL			Analog power for analog front end PLL,
107	AVD25_PLL			Analog power for analog front end PLL,
108	PLL27M_LF			Loop filter for 27MHz PLL.
109	AVD25_27M			2.5V power..
110	AVSS_27M			Ground.
111	AVSS_CVBS			Ground.
112	AVD25_CVBS			2.5V power.
113	CVBSI	AI		CVBS buffer input
114	CVBSBO	AO		CVBS/buffer output
115	NC			No connect.
116	SOGI			SQG input. Composite sync input.
117	CVBSMO	AO		CVBS mux Output
118	AVSS_AFE			Ground.
119	AVDD_AFE			2.5V power.
120	AIN[0]	AI		analog video input.
121	AIN[1]	AI		analog video input.
122	AIN[2]	AI		analog video input.
123	AIN[3]	AI		analog video input.
124	AIN[4]	AI		analog video input.
125	AIN[5]	AI		analog video input.
126	AVSS_BG			Ground.
127	AVDD_BG			2.5V power.
128	AVREF	AO		Reference voltage of analog front end.
