*) For Infineon devices in DIP-7, DIP-8 & SO-16, T_a = 75°C, T_j = 125°C and without copper area as heatsink

For Infineon devices in TO-220, T_a = 50°C, T_j = 125°C and R_{thCA} (external heatsink) = 2.7K/W.

Information furnished is believed to be accurate and reliable. However, Infineon Technologies assumes no responsibility for the consequences of use of such information nor any infringement of patents or other rights of third parties which may result from its use. No license is granted by implication or otherwise under any patent rights of Infineon Technologies.

Specifications mentioned in this publication are subject to change without notice. This publication supersedes and replaces all information previously supplied. Infineon Technologies products are not authorized for use as critical components in life support devices or systems without express written approval of Infineon Technologies.

Closest equivalent reference is based upon other manufacturers' published and our best estimation regarding possible maximum output power which depends on the combined parameters of given on-resistance, thermal resistance, ambient temperature and package used.

Infineon Technologies is an approved CECC manufacturer.
Information
For further information on technology, delivery terms and conditions and prices please contact your nearest
Infineon Technologies Office in Germany or our Infineon Technologies Representatives worldwide.

Warnings
Due to technical requirements components may contain dangerous substances. For information on the types in question please contact your nearest Infineon Technologies Office.
Infineon Technologies Components may only be used in life-support devices or systems with the express written approval of Infineon Technologies, if a failure of such components can reasonably be expected to cause the failure of that life-support device or system, or to affect the safety or effectiveness of that device or system. Life support devices or systems are intended to be implanted in the human body, or to support and/or maintain and sustain and/or protect human life. If they fail, it is reasonable to assume that the health of the user or other persons may be endangered.
