## Monitor Feature

### INTRODUCTION

#### Scope

This specification defines the requirements for the 24" MICRO-PROCESSOR based Multi-mode supported high resolution color LCD monitor. This monitor can be directly connected to general 15 pin D-sub VGA connector and eliminates the requirement of optional special display card. It also supports VESA DPMS power management and plug & play function. There is a build-in stereo audio amplifier with volume control to drive a pair of speakers.

#### Description

The LCD monitor is designed with the latest LCD technology to provide a performance oriented product with no radiation. This will alleviate the growing health concerns. It is also a space saving design, allowing more desktop space, and comparing to the traditional CRT monitor, it consumes less power and gets less weight in addition MTBF target is 20k hours or more.

#### Comparison Chart of AL2416W

Comparison Chart of AA668 & AA868

	AA668	AA868
Panel	Normal 24" panel LTM240M1-L01	Normal 24" panel LTM240M1-L01
Signal Interface	D-SUB	D-SUB & DVI-D

Headphone Jack	NO	NO
Microphone Jack	No	No
USB Hub	Not support	Not support
Tilt / Swivel	No / No	No / No
Height Adjust	Option	Option

# ELECTRICAL REQUIREMENTS

## Standard Test Conditions

All tests shall be performed under the following conditions, unless otherwise specified.

<b><u>Ambient light</u></b> :	225 lux
<b><u>Viewing distance</u></b> :	50 cm in front of LCD panel
<b><u>Warm up time</u></b>	
All specifications :	30 minutes
Fully functional :	5 seconds
<b><u>Measuring Equipment</u></b> :	Chroma 2250 signal generator or equivalent, directly Connected to the monitor under test. Minolta CA100 photometer, or equivalent
<b><u>Control settings</u></b>	
User brightness control :	Maximum (unless otherwise specified )
User contrast control:	Typical (unless otherwise specified )
<b>User red/white balance, Green/white balance and Blue/white balance control :</b>	In the center (unless otherwise specified )
<b><u>Power input:</u></b>	110Vac or 230Vac
<b><u>Ambient temperature:</u></b>	20 ± 5 °C ( 68 ± 9 ° F)
<b><u>Analog input mode:</u></b>	1280 x1024 /60 Hz
<b><u>Digital input mode:</u></b>	1920x1200/60Hz (For AA868)

## MEASUREMENT SYSTEMS

The units of measure stated in this document are listed below:

1 gamma = 1 nano tesla

1 tesla = 10,000 gauss

cm = in x 2.54

lb = kg x 2.2

degrees F = [°C x 1.8] + 32

degrees C = [°F - 32]/1.8

$u' = 4x/(-2x + 12y + 3)$

$v' = 9y/(-2x + 12y + 3)$

$x = (27u'/4)/[(9u'/2) - 12v' + 9]$

$y = (3v')/[(9u'/2) - 12v' + 9]$

nits =  $cd/(m^2)$  = Ft-L x 3.426

lux = foot-candle x 10.76

# LCD Panel Specification

## LCD Panel Model (LTM240M1-L01-L00)

### Mechanical information

Item		Min.	Typ.	Max.	Note
Module size	Horizontal(H)	-	546.4	-	mm
	Vertical(V)	-	352.0	-	mm
	Depth(D)	-	-	36.3	mm
Weight		-	-	3,550	g

### General information

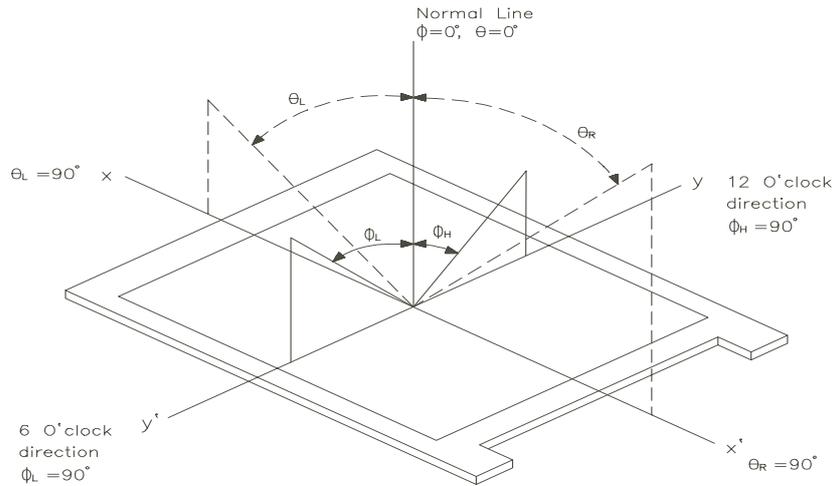

Items	Specification	Unit	Note
Display area	518.4(H) x 324.0(V)	mm	
Driver element	a-Si TFT active matrix		
Display colors	16.7M(true 8-bit)	colors	
Number of pixels	1920 x 1200	pixel	
Pixel arrangement	RGB vertical stripe		
Pixel pitch	0.270(H) x 0.270(W)	mm	
Display mode	Normally Black		
Surface treatment	Haze 25%, Hard - coating (3H)		

### Optical Information

(Inverter Freq. : 50kHz) \* Ta = 25 ± 2°C, VDD=5V, fv= 60Hz, fmax= 77MHz, IL = 6.0mA<sub>rms</sub>

Item	Symbol	Condition	Min.	Typ.	Max.	Unit	Note
Contrast Ratio (Center of screen)	C/R		-	1000	-		(3) BM-5A
Response Time	On/Off	T <sub>R</sub> +T <sub>F</sub>	-	16	-	msec	(4) BM-7

		θ R		-	89	-	
	Ver.	φ H		-	89	-	
		φ L		-	89	-	
Viewing Angle	Hor.	θ L	CR≥100	-	75	-	Degrees
		θ R		-	75	-	
	Ver.	φ H		-	65	-	
		φ L		-	65	-	
Brightness Uniformity (9 points)	B <sub>umi</sub>		-	-	25	%	(8) BM-5A

Note 1) Definition of Viewing Angle: Viewing angle range ( $10 \leq CR$ )

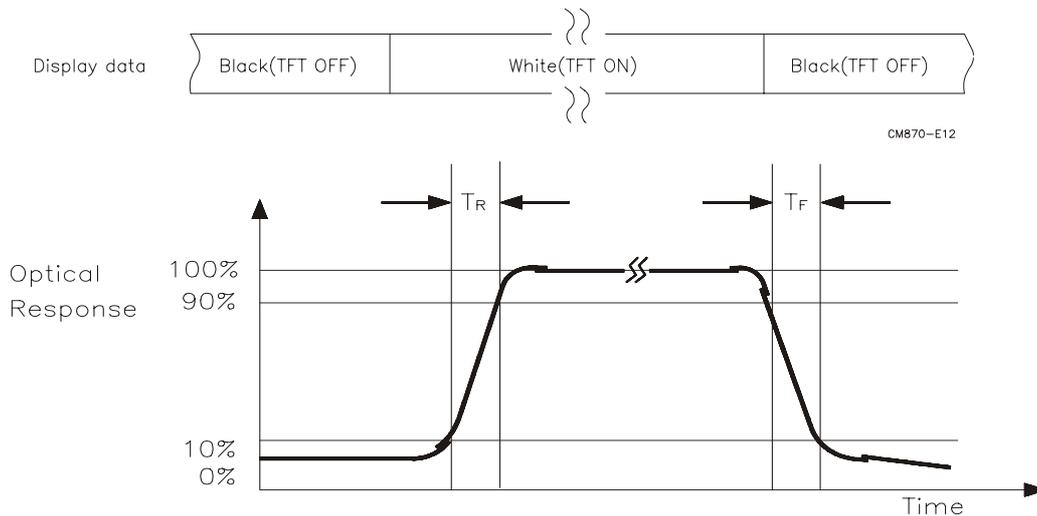

ST350-E01

Note 2) Definition of Contrast Ratio (CR): Ratio of gray max(Gmax),gray min(Gmin) at the center point of panel.

$$CR = \frac{\text{Luminance with all pixels white (Gmax)}}{\text{Luminance with all pixels black (Gmin)}}$$

Note 3) Definition of Response time: Sum of  $T_R, T_F$

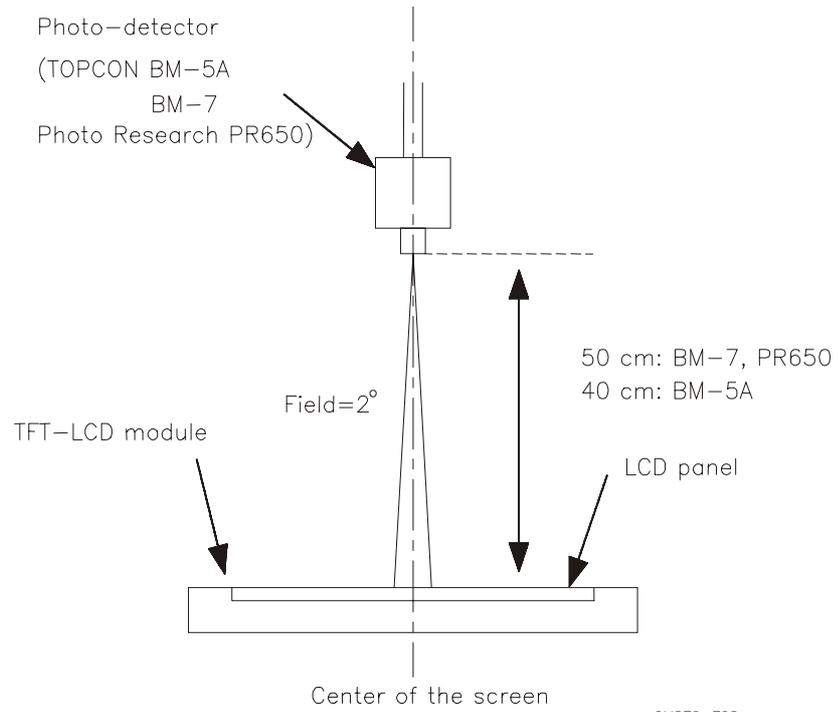

CM870-E12

Note 4) After stabilizing and leaving the panel alone at a given temperature for 30 min, the measurement should be executed. Measurement should be executed in a stable, windless, and dark room. 30 min after lighting the back-light. This should be measured in the center of screen. Dual lamp current :13.0mA(6.5mA x2)(Refer to the note(1) in the page 14 for more information ).

Environment condition : $T_a = 25 \pm 2^\circ C$

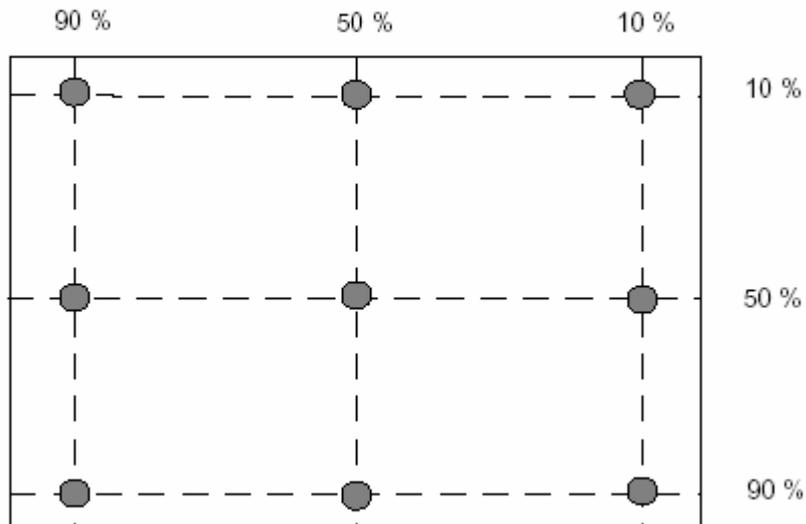

CM870-E12

## Optical characteristics measurement setup

Notes 5) Definition of Luminance of White : measure the luminance of white at center point.

Brightness uniformity of these 9 points is defined as below

Notes 6) Definition of 9 points brightness uniformity (Measuring points: Refer to the Note 5)

**AU**

$$B_{UNI} = \frac{B_{min}}{B_{max}} \times 100\%$$

**Samsung**

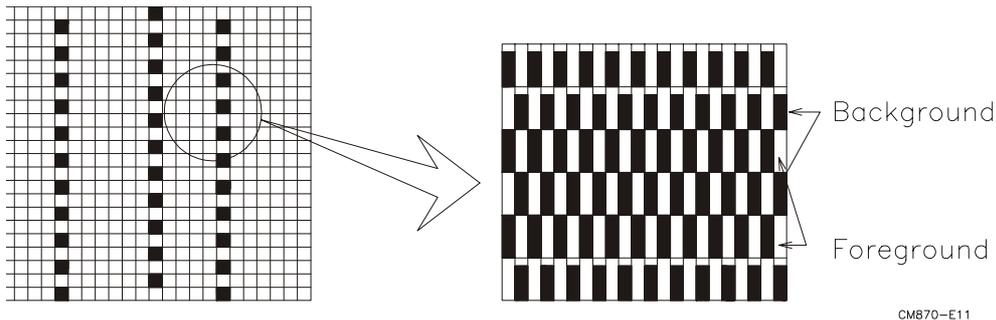

$$B_{UNI} = \frac{B_{max} - B_{min}}{B_{max}} \times 100\%$$

Bmax: Maximum brightness  
 Bmin: Minimum brightness

Notes 7) Definition of Flicker level

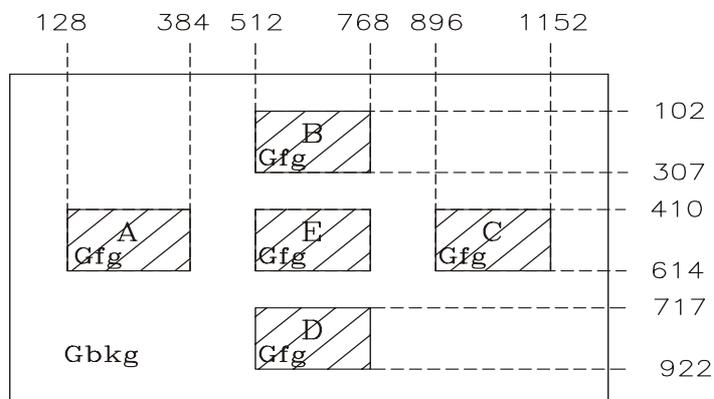

$$F = \frac{\text{Flicker Voltage}_{pp}}{\text{LMD Voltage}_{dc}} \times 100\%$$

- ◆ One maximum value of three estimated values.
- ◆ For this test, an LMD (Light Measurement Device) is needed with adequate response time to track any visible rate flicker component and with a voltage level output proportional to luminance intensity.
- ◆ Test Pattern: For dot inversion Driving (Gray levels of foreground dots on the test panel are G22, G32, and G45)
- ◆ Test Point: Center point of the display area

CM870-E11

Note 8) Definition of Crosstalk (Refer to the VESA STD)

CM870-E10

The calculation for shadowing is made from the 2 luminance measurements Gbk and Lsh, as follows:

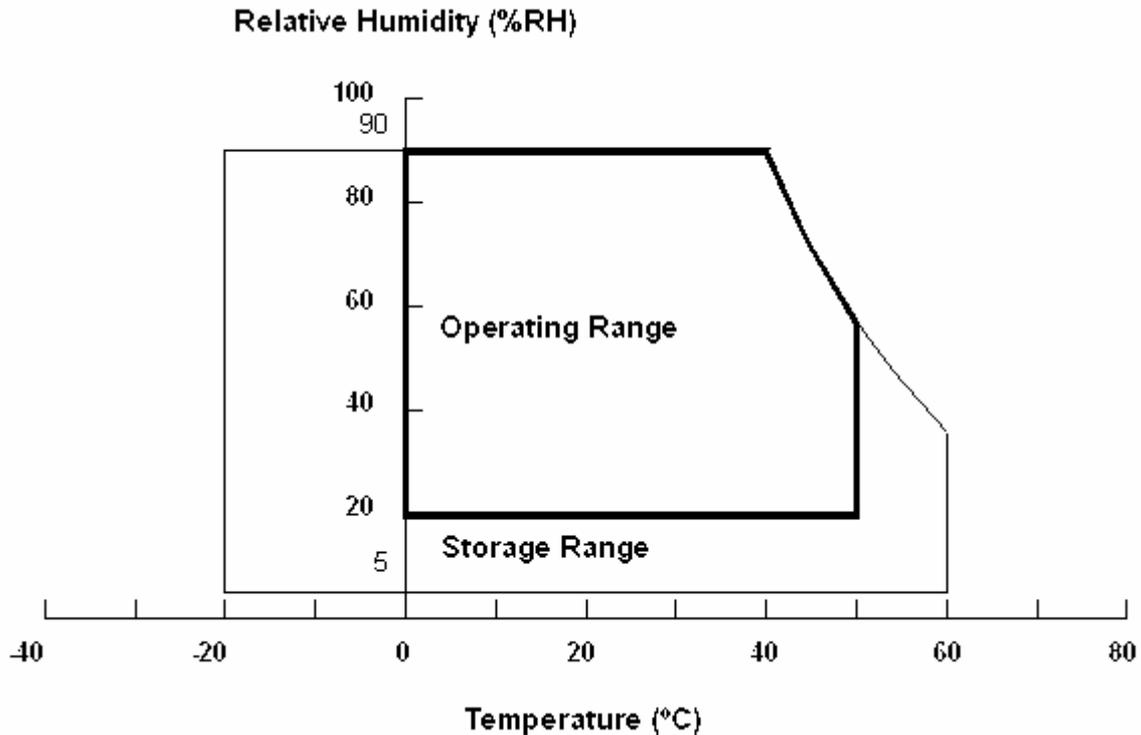

$$L_{max} - L_{min}$$

$$C_T = \frac{\text{Lmax}}{\text{Lmin}} \times 100 \%$$

Where Lmax is the larger value of Gbkg or Lsh , and Lmin is the smaller of the two.

- ◆ To determine background and foreground levels (colors), first set the background to any gray scale or color level suitable for shadowing determination. (Note that it may take several iterations of adjusting background level and box levels to determine the proper value for the background. Next display the box levels to determine the proper value for the background level. Look for shadowing in any direction from box E. Independently vary the gray level (or color) of the background and box E until the worst case shadowing is observed. This defines the background (Gbkg) and foreground (Gfg) levels to be maintained for the remainder of the test.
- ◆ One point only (the target) will be measured. To determine that point proceed as follows Using the background and foreground gray levels of step 1 (Gbkg and Gfg). Turn on each box at a time. Look for the case with the worst shadowing. The box causing the worst case is the shadowing source, or Bsrc. Use Bsrc and the box opposite from it that lies directly in the shadow path. That is the target box, or Btgt. Note that box E may be either Bsrc or Btgt, depending on the shadowing conditions, but typically Bsrc and Btgt will be a pair of opposite boxes, A&C or B&D. Btgt will only be displayed for aligning the LMD. It will be turned off for the actual measurement.
- ◆ The target box point (Btgt) will be measured with the source box (Bsrc) turned on then off. (Btgt is for alignment purpose only) Display the background only at level Gbkg. Display Btgt determined in step 2 above. Using the correct distance, angle, and measurement aperture, align the LMD to the center of the Btgt. Turn off Btgt. With Gbkg set to its proper level, measure the luminance (or color). Next, turn on the source box Bsrc. Again measure at the center point of Btgt (without Btgt present.). In this case the LMD will be measuring the shadowing level, Lsh.

## Panel Relative Humidity

JP777-E02

## Input Signals

### Video input

- Type Analog R, G, B.
- Input Impedance 75 ohm +/- 2%
- Polarity Positive
- Amplitude 0 - 0.7 +/- 0.05 Vp
- Display Color same as LCD panel

### Sync input

- Signal separate horizontal and vertical sync, or composite sync which are TTL compatible
- Polarity positive and negative.

## Interface frequency

The following frequency range is generalized by supported timing. If the entered mode does not match the supported timing the display optimization will not be assured.

- Horizontal Frequency 24KHz --80KHz
- Vertical Frequency 49Hz -----75Hz

## Supported Timing

TIMING	FH(KHZ)	SYNC	TOTAL	ACTIVE	SYNC	FRONT	BACK	PIXEL
	FV(HZ)	POLARITY	(DOT/LINE)	(DOT/LINE)	WIDTH (DOT/LINE)	PORCH (DOT/LINE)	PORCH (DOT/LINE)	FOREQ.(MHZ)

## Support Modes

There will be 28 total support modes to accommodate the above mode and other video modes within the frequency range of the monitor.

## 85Hz refresh rate Support

Monitor should display 85Hz refresh rate mode as emergency mode.

Monitor should display “Out of Range” warning menu at this mode.

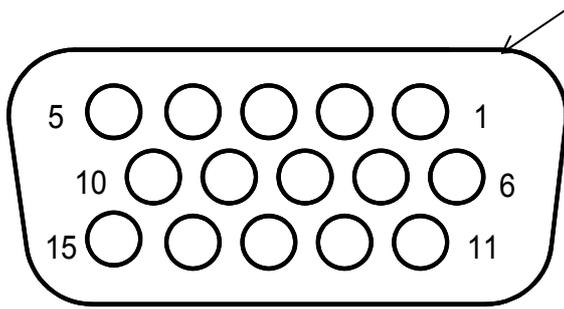

## Video input Connector

### Analog Video input Connector: 15pins mini D-Sub

\*) In case, the power of the PC unit is switched off and the power of the monitor is switched on,

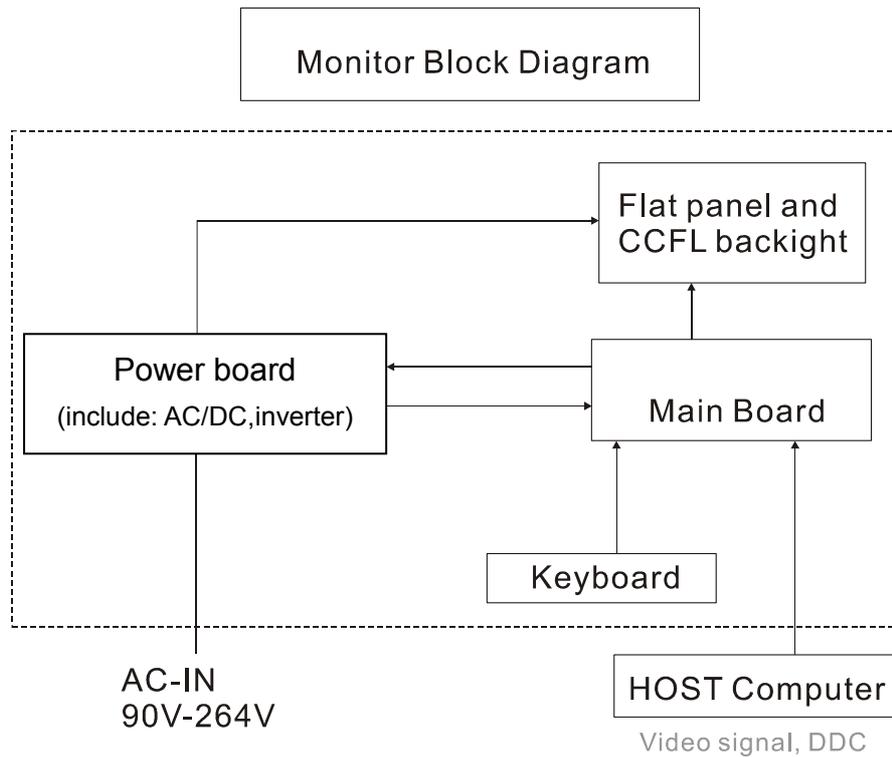

no voltage may occur at pin 14.

# MONITOR BLOCK DIAGRAM

The LCD monitor will contain an main board, an inverter/ power board, key board and internal adapter which house the flat panel control logic, brightness control logic and DDC.

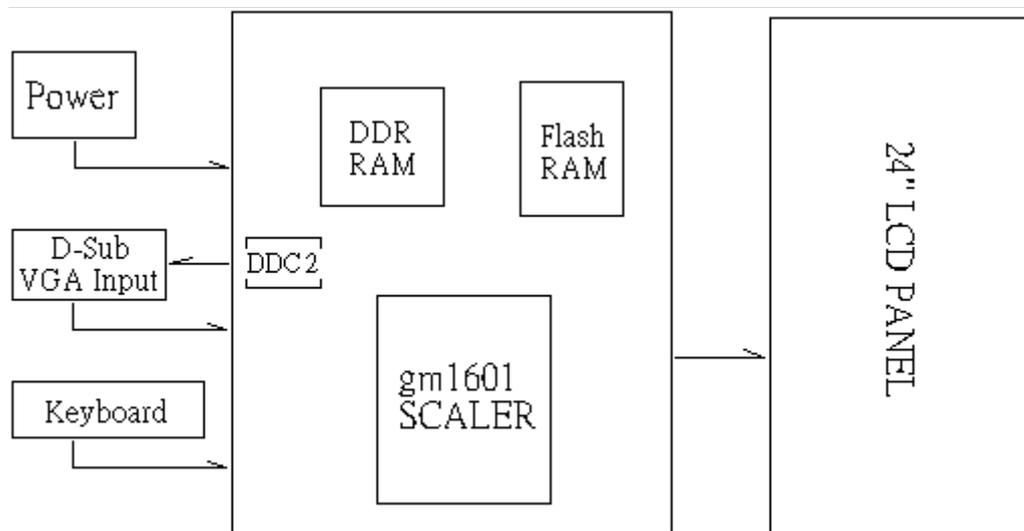

The inverter board will drive the backlight of panel and the DC-DC conversion.

The Adapter will provide thr 12V DC-power to inverter/ power board.

# Software flow chart

# General Instructions

Press the power button to turn the monitor on or off. The other control buttons are located at front panel of the monitor. By changing these settings, the picture can be adjusted to your personal preferences.

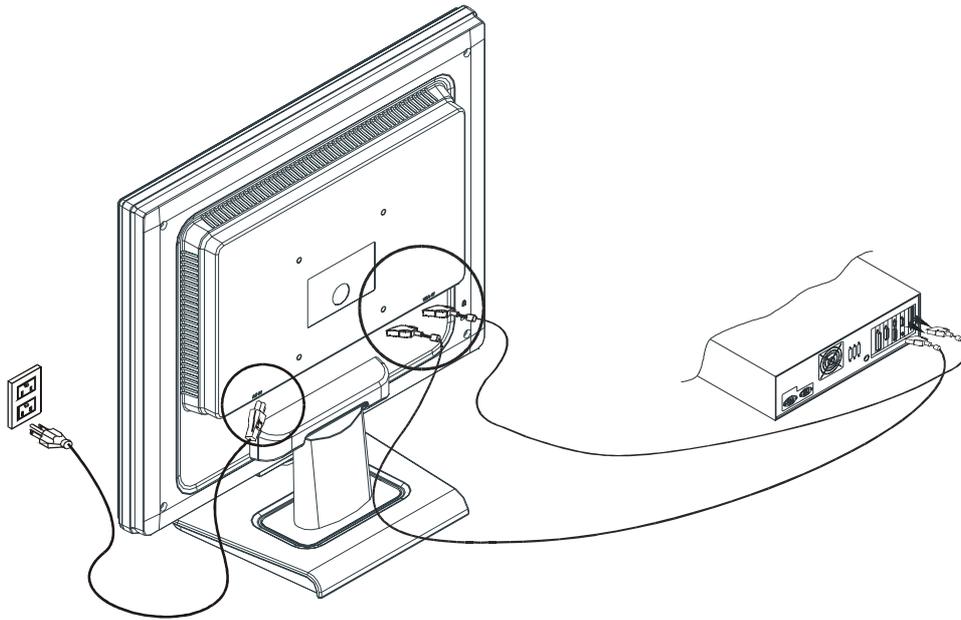

- The power cord should be connected.
- Connect the video cable from the monitor to the video card.
- Press the power button to turn on the monitor position. The power indicator will light up.

## External Controls

1	Auto Adjust Key/Exit	4	MENU/ENTER
2	<	5	LED
3	>	6	⏻ / Power Key

# System Installation

## Connecting the Display

- Power off your computer.
- Connect one end of the signal cable to the LCD Monitor's VGA port.
- Connect the other end of the signal cable to the VGA port on your PC.
- Make sure connections are secure.

## Connecting the AC Power

- Connect the power cord to the LCD Monitor.
- Connect the power cord to an AC power source.

## Gap Spec.

The step between front bezel and back cover shall be within specification.

Top and Bottom

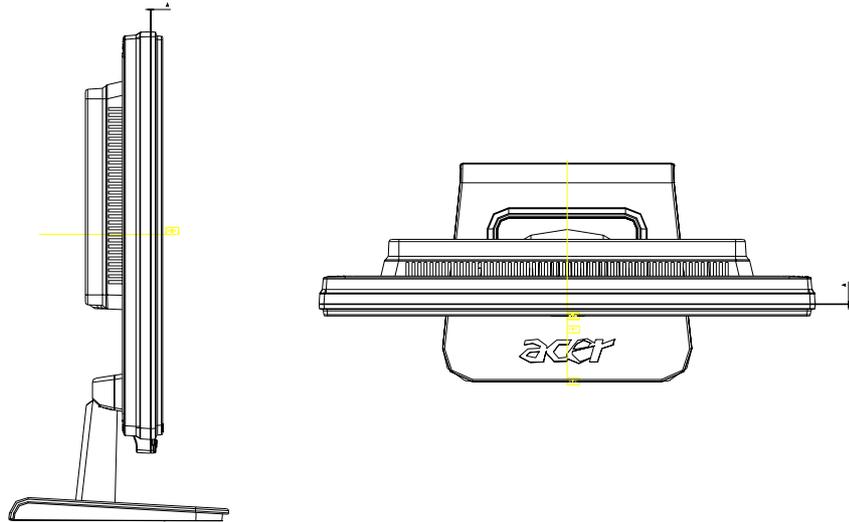

Back cover & Bezel concavity

$0.8\text{mm} \leq A \leq 1.3 \text{ mm}$

Left and Right

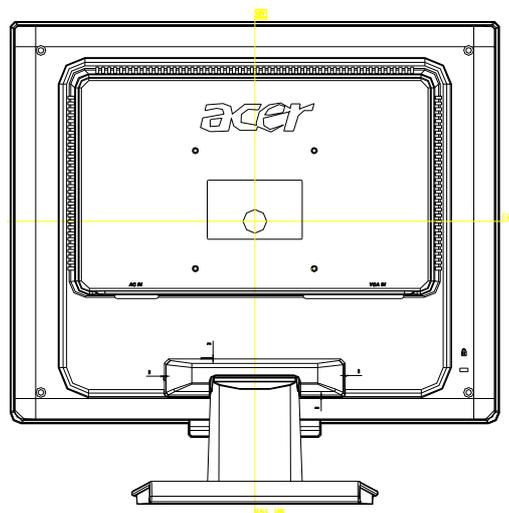

Back cover & Bezel concavity

$0.8\text{mm} \leq A \leq 1.3 \text{ mm}$

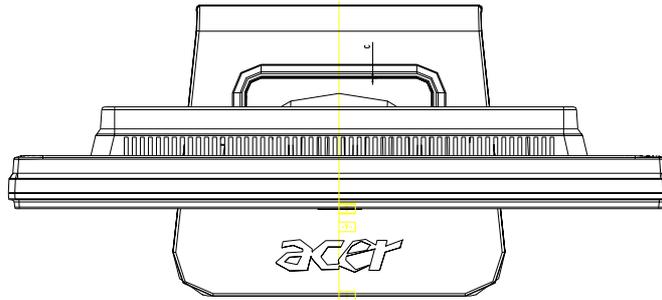

Back Cover & Hinge Cover concavity

$0\text{mm} \leq B \leq 0.5\text{mm}$

Base & Neck concavity

$$0\text{mm} \leq C \leq 0.6\text{mm}$$

Top and Bottom

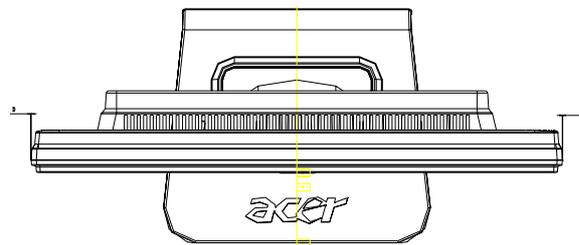

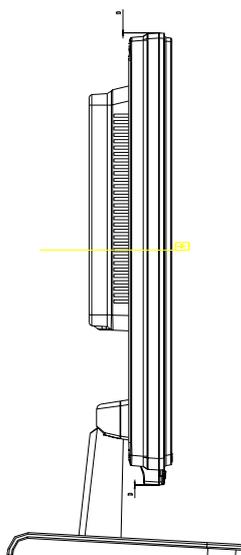

Back cover & Bezel step

$$0\text{mm} \leq D \leq 0.8 \text{ mm}$$

Left and Right

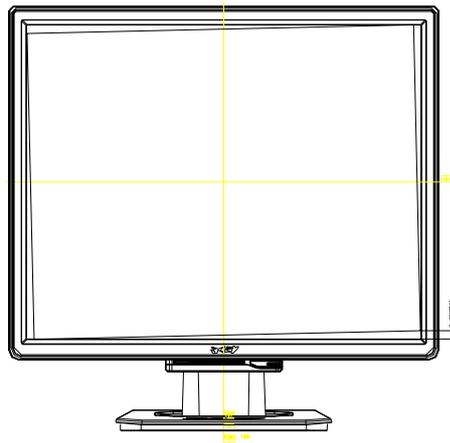

Back cover & Bezel step

$$0\text{mm} \leq D \leq 0.8 \text{ mm}$$

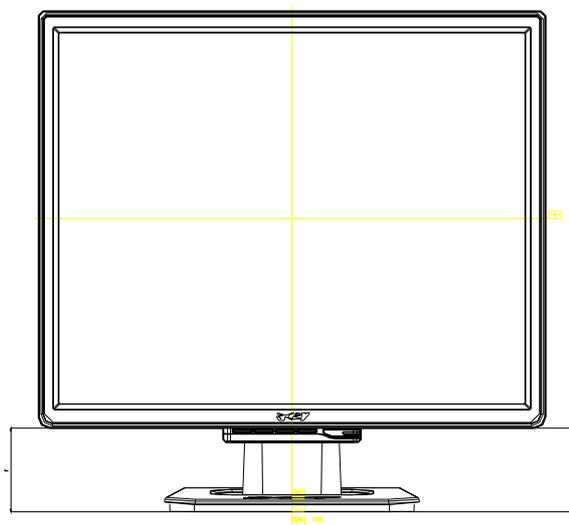

## LCD Horizontally

*The angle between front bezel and LCD unit in bottom side should not large than 1.0mm.*

*The distance of the LCD display unit from left side to right should not large than 4.0mm.*

## Tilt Base Rotation

Tilt up  $15 \pm 2^\circ$  / down  $5 \pm 2^\circ$

## Plastic Material

For TCO99

Front Bezel PC+ABS

Back Cover PC+ABS

The Others ABS 94HB

For MPRII

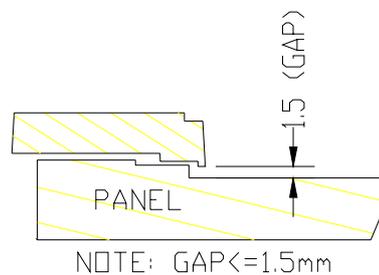

Front Bezel ABS 94V-0

Back Cover ABS 94V-0

The Others ABS 94HB

## GAP Spec.

Gap between panel with bezel is  $0 \text{ mm} < \text{gap} < 1.5 \text{ mm}$

## Swivel title noise spec.

When adjust the monitor angle, the range should be limited  $-5^\circ \sim +15^\circ$  and it should not have any noise.

# POWER/Inverter Board

## Description

This specification defined the performance and characteristic of power/inverter board.

It supplies the following outputs :

- 1). 5Vdc: Logic power.
- 2). 24Vinv: Inverter power.

## Features

Input Voltage: 100 ~ 240  $\pm 10\%$  Vac

Input Frequency: 47 ~ 63Hz

Total output power: 110Wmax

Inverter brightness adjustment: Burst mode

Protection function: auto-recovery type

## Interface Signals

### Input

AC Inlet: HUAJIE SA-4S-066 or compatible.

### Output Connector & Pin Assignment:

**1.CNS1 (to logic board),type :E&T 4500 or equivalent.**

PIN NO.	Function	Function
1	+5Vstb	+5Vdc for standby output
2	GND	Power Ground
3	GND	Power Ground
4	GND	Power Ground
5	+5Vcc	+5Vdc, connected to main board
6	+5Vcc	+5Vdc, connected to main board
7	+5Vcc	+5Vdc, connected to main board
8	+12Vcc	Audio power (N/A option)
9	GND	Signal ground
10	Power on	(24V/5Vcc)Enable signal , Active : 2V~5V, off<1V
11	Backlight on/off	Backlight On/Off control signal, connected to CNS3#12
12	Dimmer	Brightness control, connected to CN3#13,bright max.=3.3V,min.=0V.

**2.CNS3 (to Inverter board),type :E&T 4500 or equivalent.**

PIN NO.	Function	Function
1	+24Vcc	Inverter Vcc
2	+24Vcc	Inverter Vcc
3	+24Vcc	Inverter Vcc
4	+24Vcc	Inverter Vcc

10	GND	Inverter GND
11	N.C	N.C
12	Backlight on/off	Backlight On/Off control signal, connected to CNS1#11
13	Dimmer	Brightness control, connected to CN1#12,bright max.=3.3V,min.=0V.
14	N.C	N.C

**2.Inverter-side connector : YEONHO 20015 HS-04L or equivalent.**

PIN NO.	Function	Comment
1-1	Hot1	High voltage
1-2	N.C	
1-3	N.C	
1-4	Hot2	High voltage

PIN NO.	Function	Function
1	+5Vaudio	Audio power (optional).
2	GND	Audio ground
3	GND	Ground
4	GND	Ground
5	Vbri	Brightness control from logical board (0V to 3.3V)
6	----	-----
7	Ven	Inverter enable signal from logical board (high active , >3V)
8	+5Vdc	+5Vdc supply for logical board
9	+5Vdc	+5Vdc supply for logical board
10	+5Vdc	+5Vdc supply for logical board

## Output Requirement

Output Voltage	Total Regulation* <sup>1</sup>	Output Current		
		MIN.	TYP.	MAX.
+5Vstb (VCC)	+5 %/ -5%	0.05A	1.0A	1.2A
+5Vcc	+5 %/ -5%	0.0A	2.0A	2.2A
+24VINverter	+5 %/ -5%	0.0A	3.3A	3.5A

\*<sup>1</sup> Total Regulation includes (1) Line Regulation (2) Load Regulation (3) Cross Regulation

**Output Ripple/Noise: +/- 3% maximum**

### 3.4.1.3 Protection function

- 1) SCP: Short circuit protection must be acted on both outputs
- 2) OPP: Should be protected when output power consumption is within 130W .

### 3.4.1.4 Overshoot: +10% or less Full Load

### 3.4.1.5 Dynamic Loading: +5% or less Full Load

### 3.4.1.6 Efficiency: 75% min. at full load condition.

## INVERTER BOARD

### DESIGNED FOR SAMSUNG LTM240M!-L01

	MIN.	TYP.	MAX.	COMMENT
INPUT VOLTAGE	22.8V	24V	25.2V	24V+/-5%
INPUT CURRENT	-----	3.3A	-----	Vin=24V,Vbrite=3.3V
Normal BACKLIGHT VOLTAGE	-----	1800Vrms	-----	
LAMP CURRENT (every lamp)	-----	6mArms	7mArms	Each CCFL
DRIVING FREQUENCY	40KHz	-----	60KHz	
EFFICIENCY	-----	75%	-----	Vin = 24V,max
Vin ON/OFF sequence	-----	0.5S	-----	
OLP TIME	-----	1S	-----	Open lamp protection
BRIGHTNESS RANGE	30%	-----	100%	
Brightness control	0V	-----	3.3V	3.3V, brightness max.
Brightness	-----	500cd/m <sup>2</sup>	-----	
Strike voltage at 0°C	3540Vrms	-----	-----	
Strike voltage at 25°C	2830Vrms	-----	-----	
Operating life time	30,000 hrs	-----	-----	

# SAFETY

Leakage Current: 0.25mA @ 100Vac

Insulation Resistance: more than 3M ohms while withstanding a voltage of 500Vac

Hi-Pot: 3Kvac with using 3mA cut off current

## Power Consumption

The monitor is equipped with a power-management according to the below.

There is a delay of 5s ... 7s before the transition from On-state to any power saving state to avoid unintentionally entering of a power saving stage during display resolution and timing mode changes.

Transition from any power saving state to another can be instantaneous.

The recovery from Off-state requires no manual power on.

Mode	H-Sync.	V-Sync.	Video	Pw-cons.	Indicator	Rec. time*
Power-On	on	on	active	< 110W	Green LED	--
DPMS-off	off	off	blanked	< 2 W	Orange LED	< 5S
DC-Switch-off				< 1 W@100VAC	Dark LED	

SYNC. On means: Normal operation

SYNC. Off means: H sync. F < 10KHz duty cycle > 25%

V sync. F < 10Hz duty cycle > 25%

## CONNECTORS / CONTROLS

### Connectors

- Power : Monitor rear side : AC Inlet
- Analog RGB : Monitor rear side / Data Cable : 15-pin D-sub female / male

Pin – Assignment of 15-pin D-sub:

1	Red Video	9	+5V FOR DDC
2	Green Video	10	Detect
3	Blue Video	11	Serial Data for ISP
4	Serial Clock for ISP	12	Serial Data for DDC
5	Ground	13	H-Sync.
6	Red Ground	14	V-Sync.
7	Green Ground	15	Serial Clock for DDC
8	Blue Ground		

- Audio : Monitor rear side :  
-PC I/P for PC : 3.5mm Stereo female

## Monitor Control Keys

KEY : Power , Menu , Adjust +/- , Vol +/-, Auto

## Position Of Controls

Position of all switches : Bottom side of front bezel

Position of LED : Bottom side of front bezel

# Chapter 2

## Operating Instructions

---

### CONTROLS

#### Control panel (monitor front panel)

1. Power ON/OFF switch, push to ON and push to OFF. (toggle switch)
2. Power LED, will be green when monitor is on; be amber when in power saving mode.
3. Function select.
4. Adjust increase.
5. Adjust decrease.
6. Auto adjust.

## Main OSD Menu:

### Outline:

(option)

### The description for control function :

Main Menu Icon	Sub Menu Item	Sub Menu Icon	Description	Adjustment Range	Reset Value
	Contrast		Contrast from Digital-register.	0-100	Recall Cool Contrast Value
	Brightness		Backlight Adjustment	0-100	Recall Cool Brightness Value
	Focus		Adjust Picture Phase to reduce Horizontal-Line noise	0-100	Do Auto Config
	Clock		Adjust picture Clock to reduce Vertical-Line noise.	0-100	Do Auto Config
	H. Position		Adjust the horizontal position of the picture.	0-100	Do Auto Config
	V. Position		Adjust the vertical position of the picture.	0-100	Do Auto Config
	Warm	N/A	Recall Warm Color Temperature from EEPROM.	N/A	The Color Temperature will be set to Cool.
	Cool	N/A	Recall Cool Color Temperature from EEPROM.	N/A	
	User / Red		Red Gain from Digital-register.	0-100	100
	User / Green		Green Gain Digital-register.	0-100	100
	User / Blue		Blue Gain from Digital-register.	0-100	100

	English	N/A	Set OSD display language to English.	N/A	The Language will be set to English.
	繁體中文	N/A	Set OSD display language to Traditional Chinese.	N/A	
	Deutsch	N/A	Set OSD display language to German.	N/A	
	Français	N/A	Set OSD display language to French.	N/A	
	Español	N/A	Set OSD display language to Spain.	N/A	
	Italiano	N/A	Set OSD display language to Italian.	N/A	
	简体中文	N/A	Set OSD display language to Simplified Chinese.	N/A	
	日本語	N/A	Set OSD display language to Japanese.	N/A	
	H. Position		Adjust the horizontal position of the OSD.	0-100	50
	V. Position		Adjust the vertical position of the OSD.	0-100	50
	OSD Timeout		Adjust the OSD timeout.	10-120	10
	Auto Config	N/A	Auto Adjust the H/V Position, Focus and Clock of picture.	N/A	N/A
	N/A	Source Change	Analog and Digital source change.(option)	N/A	N/A
	Information	N/A	Show the resolution, H/V frequency and input port of current input timing.	N/A	N/A
	Reset	N/A	Clear each old status of Auto-configuration and set the color temperature to Cool.	N/A	N/A
	Exit	N/A	Exit OSD	N/A	N/A

## OSD Message:

### Outline:

### The description for OSD Message :

Item	Description
Auto Config Please Wait	When User Press Hot-Key "Auto", will show this message, and the monitor do the auto config function.
Input Not Supported	When the Hsync Frequency, Vsync Frequency or Resolution is out of the monitor support range, will show this message. This message will be flying.
Cable Not Connected	When the video cable is not connected, will show this message. This message will be flying.
No Signal	When the video cable is connected, but there is no active signal input, will show this message, then enter power saving.

## LOGO:

When the monitor is power on, the LOGO will be showed in the center.

## Item of Factory menu

Vendor may customize design and add adjustment items Factory menu as far as all required items are included.

### **1) Bright**

Adjust Brightness and Contrast value to Max.

### **2) Auto Balance**

Adjust each R, G, B contrast (gain) and offset.

Method of auto adjust is depends on hardware.

Adjusted value of R, G, B gain shall be used for initial value of Contrast in user menu.

All value shall be adjustable manually.

This function shall be located in 3. tag of Factory menu.

### **3) Factory color temp data edit**

Following data for color temp shall be editable manually.

-color temp default preset No.

## Plug and play

### Plug & play DDC2B feature

This monitor is equipped with VESA DDC2B capabilities according to the VESA DDC STANDARD. It allows the monitor to inform the host system of its identity and, depending on the level of DDC used, communicate additional information about its display capabilities. The communication channel is defined in two levels, DDC2B.

The DDC2B is a bidirectional data channel based on the I<sup>2</sup>C protocol. The host can request EDID information over the DDC2B channel.

**THIS MONITOR WILL APPEAR TO BE NON-FUNCTIONAL IF THERE IS NO VIDEO INPUT SIGNAL. IN ORDER FOR THIS MONITOR TO OPERATE PROPERLY, THERE MUST BE A VIDEO INPUT SIGNAL.**

This monitor meets the Green monitor standards as set by the Video Electronics Standards Association (VESA) and/or the United States Environmental Protection Agency (EPA) and The Swedish Confederation Employees (NUTEK). This feature is designed to conserve electrical energy by reducing power consumption when there is no video-input signal present. When there is no video input signal this monitor, following a time-out period, will automatically switch to an OFF mode. This reduces the monitor's internal power supply consumption. After the video input signal is restored, full power is restored and the display is automatically redrawn. The appearance is similar to a "Screen Saver" feature except the display is completely off. The display is restored by pressing a key on the keyboard, or clicking the mouse.

### Using The Right Power Cord

The accessory power cord for the Northern American region is the wallet plug with NEMA 5-15 style and is UL listed and CSA labeled. The voltage rating for the power cord shall be 125 volt AC.

Supplied with units intended for connection to power outlet of personal computer: Please use a cord set consisting of a minimum No. 18 AWG, type SJT or SVT three conductors flexible cord. One end terminates with a grounding type attachment plug, rated 10A, 250V, CEE-22 male configuration. The other end terminates with a molded-on type connector body, rated 10A, 250V, having standard CEE-22 female configuration.

Please note that power supply card needs to use VDE 0602, 0625, 0821 approval power cord in European countries.

## White Color Temperature

White color temperature is 4 preset as 9300, 7500,6500 and User,

Default value of user color should be user which is maximum setting for panel.

Target of color setting

Color Temp.	Color Coordinate		Tolerance	Color Coordinate		Tolerance
	x	y		u'	v'	
9300K	0.283	0.297	$\pm 0.03$	0.189	0.446	$u'v' \leq 0.01^*$
6500K	0.313	0.329	$\pm 0.03$	0.198	0.469	$u'v' \leq 0.01^*$
User	-	-		-	-	-

\*) TCO'0X A.2.6.1 requirement

User should follow "Microsoft Windows Color Quality Specification for Liquid Crystal Display OEM's".

(<http://www.microsoft.com/hwdev/tech/color/ColorTest.asp>)

## Electrical characteristics (Tamb=25°)

Audio amplifier(USE Panasonic VP-7723A Audio Analyzor. )

Item	Audio Input	Freq.	Spec.			Comment
			Min.	Typ.	Max.

Volume Control			-	-	-	Analog

## Machine Disassembly and Replacement

---

### Disassembly Procedure

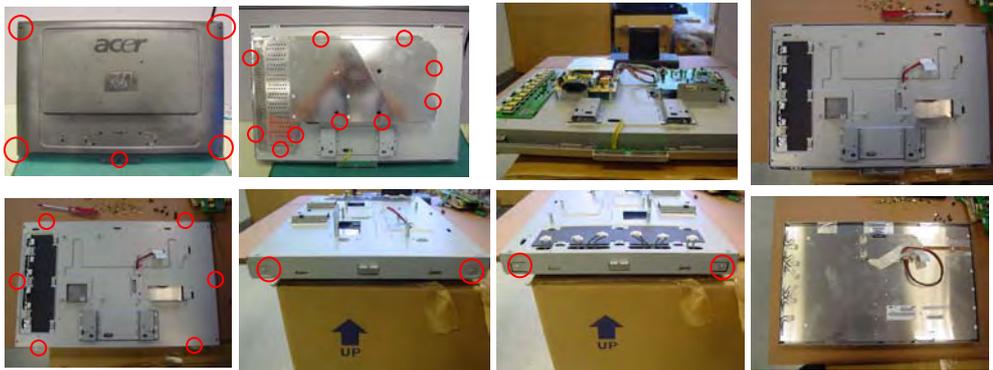

#### Disassemble the base

1. Remove the neck cover.
2. Remove the four screws to release the hinge.
3. Remove the base

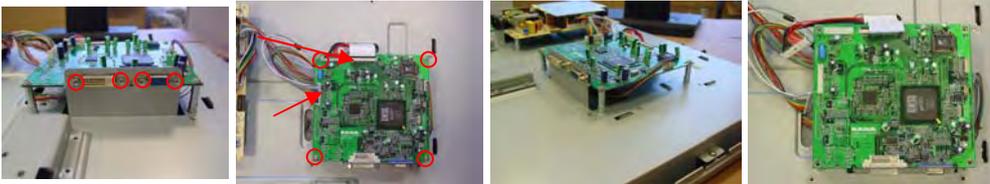

#### Disassemble the chassis

1. Remove the five screws to release the back cover.
2. Remove the two screws to release the EMI cover from chassis.
3. Remove the Main Board, Power Board, Inverter and Key Board. (See the next page for detail.)
4. Remove the six screws from chassis then take the chassis.
5. Remove the four screws from chassis and release the panel.

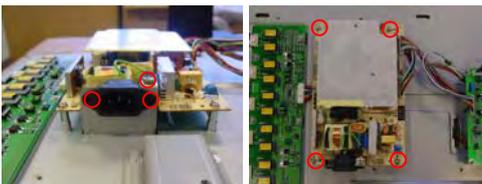

## Disassemble the main board

1. After remove EMI cover from chassis.
2. Remove the four screws from chassis.
3. Remove the four screws from chassis and release the main board.
4. Disassemble audio line from power board.
5. Disassemble two VL-VK lines from VL board.
6. Disassemble power line from VL board.
7. Disassemble FPC line from VL board.

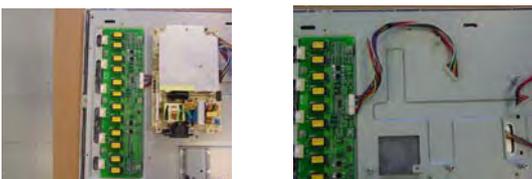

## Disassemble the power board

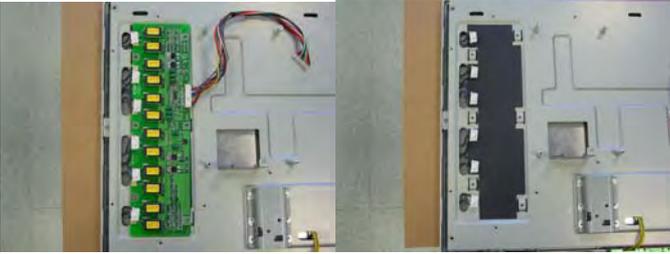

1. After remove main board then disassembly the power board.
2. Remove the three screws from **power**.
3. Remove the four screws from **power**.
- 4.
5. Disassemble two voltage lines from power board.
6. Remove the one screw to release line from Chassis.
7. Remove the three screws from Chassis.
8. Remove the two screws to release power board from Chassis.
9. Then take the power board from the chassia.

## Disassemble the Inverter and key board

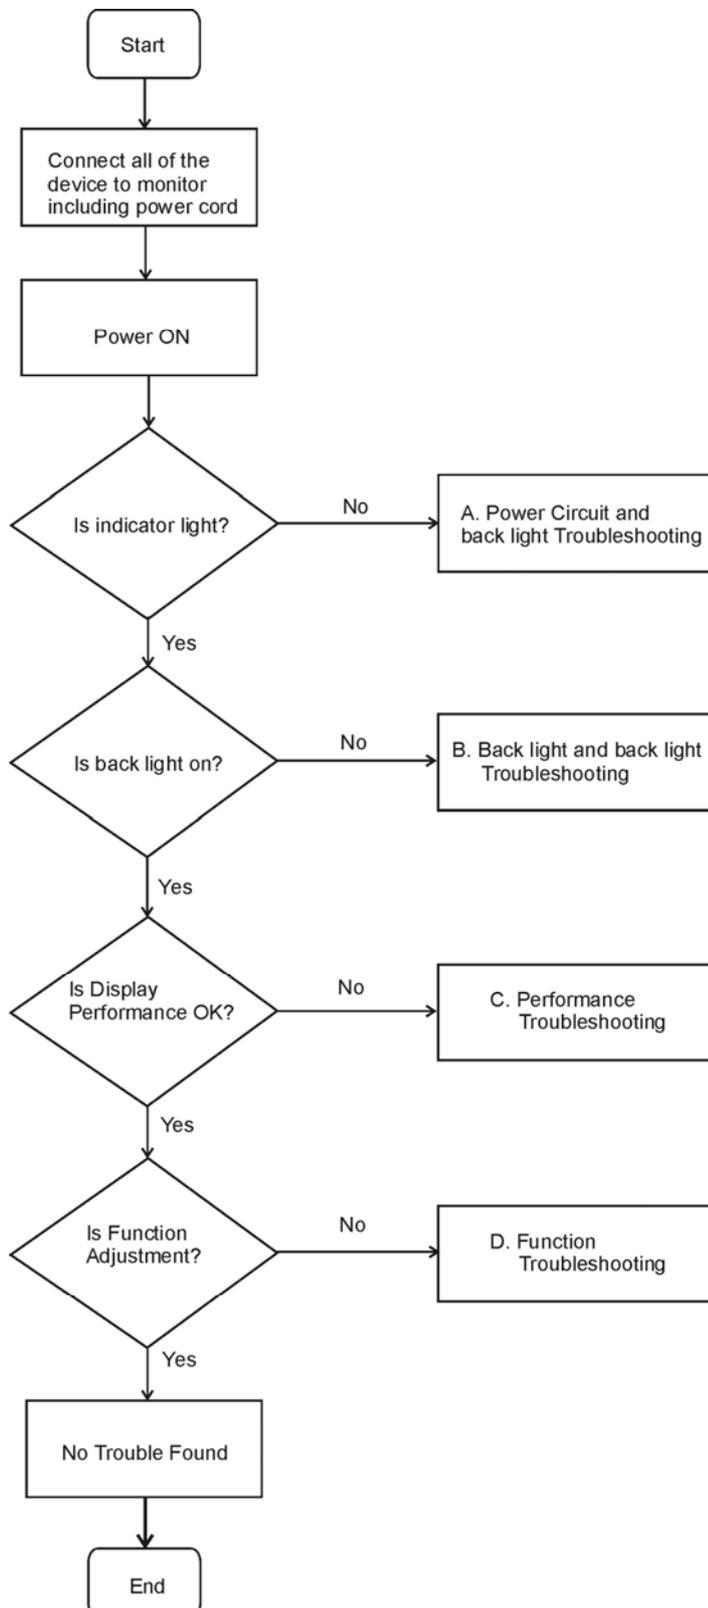

1. Remove the one screw to release VK board from bezel.
2. Disassemble the two speaker lines from VK board.

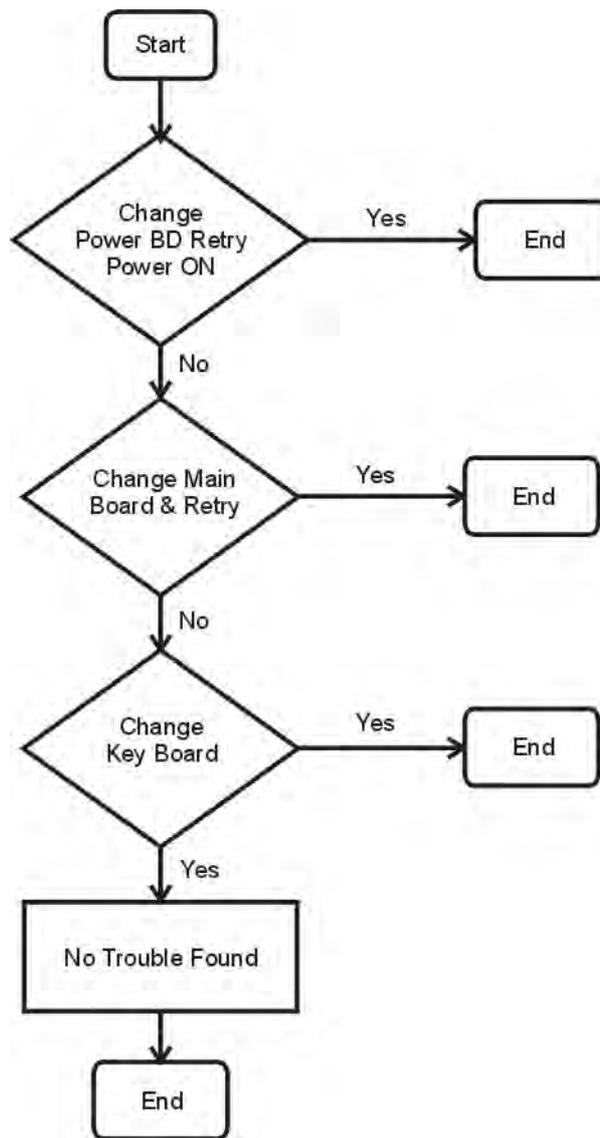

## Troubleshooting

15	SCL

## **FRU (Field Replaceable Unit) list**

---

This chapter gives you the FRU (Field Replaceable Unit) listing in global configurations of AL1916. Refer to this chapter whenever ordering for parts to repair or for RMA (Return Merchandise Authorization).

NOTE : Please note WHEN ORDERING FRU PARTS, that you should check the most up-to-date information available on your regional web or channel(<http://aicsl.acer.com.tw/spl/>). For whatever reasons a part number change is made, it will not be noted in the printed Service Guide. For ACER-AUTHORIZED SERVICE PROVIDERS, your Acer office may have a DIFFERENT part number code to those given in the FRU list of this printed Service Guide. You MUST use the local FRU list provided by your regional Acer office to order FRU parts repair and service of customer machines.

NOTE: To scrap or to return the defective parts, you should follow the local government ordinance or regulations on how best to dispose it, or follow the rules set by your regional Acer office on how to return it.
